Planned spend for Sept 23/24	£1073.15

### **Impact of funding:**

**Amaven** - an organised scheme of work enables members of the PE Team to utilise their accredited teaching & coaching qualifications. Also allows the PE team to further enhance the quality of the teaching & learning opportunities provided for our children. Amaven provides our assessment system which shows us how our children are developing physically throughout the year. Those children who are less physically literate are then targeted for PE intervention.

**Salary** - outstanding PE/ Swimming practitioners further enhance the quality of teaching within our school.

**Healthy eating provisions** - Smoothie Making day for KS2. Our children are able to make healthier choices relating to their lifestyle, have an understanding of benefits and draw back of making healthy or unhealthy choices and be better prepared to learn and achieve.

**Equipment** – Provisions have enabled us to run a number of full school charity / enrichment events. These provide children with an opportunity to further their fitness levels, support local charities and learn about those who are less fortunate.

**PE Uniform** - Maintaining a high profile for PE throughout the school is important, as PE teachers remain an integral part of the role model standard provided by staff.

**Outdoor Play Provision** - Ensuring a structured play environment at break and lunch time is essential for physical development.

**School Games** - Entry costs to sporting events allow our children to access different sporting competitions that they may not normally be able to attend.
